What are the different types of solar inverters?

Most solar inverters will fall into one of these three categories. Grid-tied inverter: Grid-tied solar inverters are the most common inverter type you'll come across. As the name suggests, these inverters require a grid connection to operate and are capable of pulling power from the grid as well as feeding power to the grid.

How do I choose the right solar inverter type?

There are two categories to consider when deciding on the right solar inverter type: the solar inverter technology, and the type of solar power system the inverter is for. String inverter: A string inverter is a single, standalone unit that converts power from a whole string (or strings) of solar panels.
