

How many offshore wind projects have Biden-Harris approved?

The Biden-Harris Administration has approved four commercial-scale, offshore wind energy projects and remains on track to complete reviews of at least 16 offshore wind project plans by 2025, representing more than 27 gigawatts of clean energy. An Action Plan for Offshore Wind Transmission Development in the U.S. Atlantic Region

How did Massachusetts get a bid for offshore wind?

Massachusetts received bids for offshore wind in response to the region's largest solicitation to date, seeking up to 3,600 megawatts. Massachusetts, Rhode Island and Connecticut joined in a historic agreement that allows for potential coordinated selection of offshore wind projects. The bids came from Avangrid Renewables, South Coast Wind Energy and Vineyard Offshore.

What is New England's first multistate procurement of offshore wind?

This month, New England states will announce the results of the first multistate procurement of offshore wind in the United States. Developers Orsted, Avangrid, Vineyard Offshore and partners EDP and Engie bid to secure up to 6 GW of new offshore wind capacity in Massachusetts, Connecticut and Rhode Island in an auction that closed in March.

How does a multistate wind project work?

Together, the three states aim to secure 8.5 GW of offshore wind power by 2030. The multistate procurement allowed developers to submit multiple project bids to one or more states, through a single process. The states may offer separate offtake contracts or join forces to select proposals that would benefit more than one state.

Which states are proposing offshore wind projects?

Massachusetts, Rhode Island and Connecticut received proposals for offshore wind projects. The three East Coast states hope to boost their reliance on the renewable energy source.

How many offshore wind energy leases will there be in 2024?

On April 24, 2024, Secretary of the Interior Deb Haaland announced a new five-year offshore wind lease schedule, which includes up to 12 potential offshore wind energy lease sales through 2028. Future lease sales

What are electrical power monitoring systems
(EPMS)? Electrical power monitoring systems
(EPMS) make visible the often-overlooked data and
health of electrical distribution systems. Typically
EPMS is comprised of meters and software installed
on a server. Moreover, they offer physical means of
communication between the meters and server.
