Located some 180 km west of Bamako, in Mali's Kayes Region, this 50 MWp solar plant injected its first kilowatt-hours into the Malian power grid in March 2020. The Kita solar plant is actively participating in the increase in the country's electrification rate, an essential parameter for economic and social development.

Among the world's famous renewable energy solution providers since 2007 - Explore BigBlue's most reliable and high-performance energy storage systems, portable power stations, solar panels, and solar chargers for your home grid & off-grid lifestyle.

The independent power producer (IPP) now
 supplies 50 MWp to Mali's national electricity grid.
 This is possible thanks to its solar power plant in
 Kita, which is coming on stream after several
 months of work. The electricity produced is sold to
 the public company Electricit? du Mali (EDM) under
 a 30-year power purchase agreement (PPA).

The government of Mali has secured further funds to build the country's first large-scale PV project. The 33 MW Segou Solar PV Project will sell power to local utility under a 25-year PPA.

According to the International Renewable Energy Agency (IRENA), Mali boasts significant solar power potential, particularly in its northern regions, where annual sunshine hours exceed 3,000 hours. This abundant sunlight provides a strong natural foundation for the implementation of solar energy projects. Despite this vast potential, Mali's renewable energy market is still in its early ???

The findings reveal that a substantial part of Mali's land is suitable for solar PV and wind energy projects. Specifically, the study estimates that Mali could potentially develop up to approximately 398.7 gigawatts (GW) of solar PV and 1.25 GW of onshore wind energy.

The SolarPowa solar charger series (SolarPowa 36, SolarPowa 28, SolarPowa 14) continues to harness power for your road trip, sailing adventure, beach gateway, or camping trip with an energy conversion of up to 25.4% into free ???

The maximum nominal / rated output of the SolarPowa 30 solar charger is rated based on the Standard Test Conditions (STC) ??? the industry-wide standard for the conditions under which a solar panel is tested. The test conditions are defined as irradiation 1000 W/m², temperature 25°C, and air mass 1.5.
