Our editor had a chance to install a Shorai LFX lithium battery in his Kawasaki KLX300 for some testing and there are some very noticeable improvements over the stock lead-acid battery. The most obvious is the fact that the Shorai LFX was a whopping 3.2 pounds lighter (1.5 lbs vs 4.7 lbs). Voltage also increases from 12V to 13.3V, which means the engine cranks ???

# BIKEMASTER LITHIUM ION BATTERY CHARGER

The BikeMaster Lithium-Ion Battery Charger/Maintainer is very affordable and it will save you money in the long run. This charger is also very effective at prolonging the life of your bike's battery. # BIKEMASTER LITHIUM ION BATTERY CHARGER

The most advanced high-power Lithium Ion Phosphate battery technology from BikeMaster. Ultra high cranking amps from a super lightweight battery-only 1/3 the weight of a lead acid battery. Built-in charge and equalizing protection board, preventing over charging. Remarkably low self-discharge for extended storage periods up to one year.

Rated 4 out of 5 by GGM1224 from Working great so far My recommended battery was a BikeMaster Lithium Ion Battery KTM DLFP-04L-BS - 780833. It's super light and compact. I was surprised at the small size of the battery recommended and it's a tight fit into a 2016 KTM 350 XC-F (likely tight for all 2016 big bikes) due to the battery height if you want to use the bikes plastic ???

The other advantage of the Bikemaster Lithium Ion batteries is the ease of maintenance. The batteries come sealed and ready for use and requires no additional fluids. Can be charged using a conventional 12V lead-acid battery charger (without pulse charging function) or a specially designed LiFePo4 battery charger;
