

Solar mesh is a low-tech solution to protect your high-tech solar panels. The system is simple and involves clipping wire mesh panels to the edges of your solar panels. The mesh prevents birds and other animals from accessing the space beneath your solar panels; air can still circulate beneath the panels, but nothing else will get through.

Reading Time: 3 minutes A surprising threat to your solar panels may be the animals that live in the area surrounding your home. Birds and squirrels can damage your solar setup in several ways, leading to unwanted repair costs and headache. One solution to solar's animal problem is to install "critter guards," a physical barrier [???

Block up any spaces in your roof or walls where birds may nest. Netting, wood and wire mesh are good options. Remember, birds can get into the smallest of spaces. Protect your valuable assets with Solar Panel Bird Mesh. Compared to the high cost and inconvenience of replacing a damaged solar panel, installing our bird mesh is a very modest
