

Can you replace a lithium ion battery on a Black & Decker tool?

Lithium ion batteries are lighter and smaller than the 18V batteries and can hold a charge longer. Before you replace the battery, determine if your tool will still work. If you cannot find a lithium ion battery that matches your tool, contact Black & Decker. Give the company your model number and ask about replacing the battery.

Which Black & Decker 20 volt Max lithium ion battery is best?

The key to Black & Decker 20-volt MAX Lithium system for power and garden tools, the LBXR20-volt MAX lithium-ion battery is always ready to go thanks to its ability to hold charges up to 500 days. The Black & Decker 20-volt MAX lithium-ion battery offers a longer lifespan and retains its charge 5x longer than similar 18-volt NiCad batteries.

What kind of batteries does Black & Decker use?

The company makes a wide variety of handheld tools, including power drills and electric screwdrivers, as well as items used for gardening tasks. Each Black & Decker power tool uses one of three types of batteries: lithium ion, sealed lead acid or nickel cadmium. An 18V battery is one of the nickel cadmium batteries.

Why is my Black & Decker battery not charging?

If so, please allow the battery to cool, then reinsert the battery on charger to try charging again. If this still does not work, please call Black & Decker Customer Service at 800-544-6986 during eastern business hours. US and Canada.

What is the difference between 18v and lithium ion batteries?

An 18V battery is one of the nickel cadmium batteries. Lithium ion batteries are lighter and smaller than the 18V batteries and can hold a charge longer. Before you replace the battery, determine if your tool will still work. If you cannot find a lithium ion battery that matches your tool, contact Black & Decker.
