

Kirkland & Ellis advised Blackstone portfolio company Legence, an Energy Transition Accelerator??? and leader in building efficiency, on its acquisition of Black Bear Energy. Black Bear's addition to Legence's rapidly growing portfolio expands the firm's renewable energy procurement services and further strengthens its capabilities for

Black Bear Energy, a US-based buyer's representative that serves large property owners looking to procure renewable energy, said on Monday it has raised USD 2.5 million (EUR 2.3m) from a Series A financing round.

This renewable natural gas (RNG) digester project was a joint effort between OPAL Fuels, LLC, Black Bear Environmental Assets, Live Oak Bank, Southwest Gas Corporation, and Montrose's team of industry experts.

Founded in 2015 and based in Colorado, US, Black Bear Energy Inc. operates as a technology-enabled energy services company that represents commercial renewable energy buyers and helps them deploy renewable and clean-tech projects.

Renewable energy sources (RES) are currently being substantially integrated into the power grid because of the recent liberalization of the energy market and associated benefits to both the environment and the economy. A significant amount of renewable energy sources are stochastic and weather dependent, being integrated into the power system that causes a ???

Solar is an important part of Virginia's all-of-the-above energy mix. Looking ahead, Dominion Energy plans to responsibly work with landowners, local governments, and community partners to develop enough renewable energy to power 4 million homes. These projects provide new tax revenues, jobs and economic opportunities for our communities.

The addition of Black Bear Energy extends Legence's leading position in renewable energy deployment across the built environmentSAN JOSE, Calif., July 19, 2022 (GLOBE NEWSWIRE) -- Legence, an

This financing model was made possible through cooperation and coordination with CollectiveSun, Sol Energy, PAE, SunPower, Black Bear Energy, and Holy Cross Electric, RMI's local utility provider. A solar financing solution that strengthens our relationships with donors, helps achieve our net-zero strategy, and provides a direct return on

Black Bear Solar is on the smaller side of Dominion Energy's solar fleet; at a peak capacity of 1.6 megawatts, it can power about 400 homes when the sun's shining its brightest. It's a buzzy topic in renewable energy circles; the U.S. Department of Energy advocates the strategy, and research shows mutual economic and environmental

Dominion Energy's 1.6 MW Black Bear Solar project in Buckingham County is now partnered with Mountain House Apiaries, using Italian honey bees to maintain the land around the solar arrays while benefiting the local agricultural community. The project falls under the category of agrivoltaics

The Sequoia Park Zoo posted the following on social media: Sequoia Park Zoo is devastated by the loss of our beloved Noni bear. On the afternoon of Wednesday, October 9, 2024, Noni was rushed to

The "black price" for each megawatt hour (MWh) generated and sold into the electricity market. The "green price", for large-scale generation certificates (LGCs) ??? for each megawatt hour (MWh) of generation accredited under the Federal Government's Renewable Energy Target scheme. Revenue from this market has most commonly been

Black Bear Habitat Selection and Movement in Response to Wind Energy Tawnee Dupuis¹, Jaclyn Comeau², Katherina Gieder², Mark S. Boyce¹
¹University of Alberta, Dept. of Biological Sciences
²Vermont Fish and Wildlife Department Introduction
 ??? Growing commitment to renewable energy solutions worldwide ??? Wind energy among fastest growing sectors¹

Co-developed by Black Bear Energy and SRE, the systems have an aggregate capacity of 11.6 MW and will generate over 15 million kWh of electricity annually - the equivalent of powering nearly 1,500

With nearly a decade of expertise in on-site renewable deployment, Black Bear has executed hundreds of projects across the United States. Adding them to our team extends Legence's portfolio of rapid decarbonization capabilities, and ???

Renewable energy (or green energy) is energy from renewable natural resources that are replenished on a human timescale. The most widely used renewable energy types are solar energy, wind power, and hydropower. Bioenergy and geothermal power are also significant in some countries.

Black Bear Energy is the industry's most experienced client advocate to help you realize your energy potential. Black Bear is a technology enabled services business that competitively sources energy projects to client specifications. With expertise in both real estate and clean energy, the team understands the challenges faced when navigating onsite renewable energy deployment.
