Blue Shark Power System has sealed a Memorandum of Understanding (MOU) with the Republic of Djibouti that will see it supply 495 of its Blue Shark River turbines, with a capacity of 240 kW each. Under the same pact, the French firm will conduct a feasibility study and test one turbine in the first half of next year. Delivery of the first 80

The horizontal axis marine turbine Blue Shark, is a hydrokinetic turbine designed to produce clean energy exploiting slow-moving flows of water, as large river, tidal or water currents. The Blue Shark device is acting naturally like a shark swimming in the water. The patented turbine has been developed since 2002 after developments made in collaboration with several European ???
