Construction is underway on a solar-plus-storage project in Burt and Dodge Counties. Tekamah, NE??? 3/3/2021 ??? Bluestem Energy Solutions announced this week that it is constructing the first utility-scale solar-plus-storage project to be built in tandem in Nebraska. With the addition of a 2 MW solar array and a 6 MWh battery energy storage system, Burt County ???

Bluestem Energy Solutions LLC, doing business as Lawrenceburg Solar, plans to use an \$8.2 million investment to build a solar power facility that will produce 6.1 megawatts of renewable energy in rural portions of southern Tennessee. This will provide enough locally generated electricity to power 1,200 homes.

Bluestem Energy Solutions works to identify, develop, and implement local energy solutions for utilities. Their current vision originates from the first connection to the distribution system with a two turbine wind farm. Lists Featuring This Company. Edit Lists Featuring This Company Section.

Here's how it works: governors in West Coast states have signed on to mandates aimed at reining in greenhouse gases and smog-producing emissions from transportation fuel, and policymakers in the Northeastern U.S. have eyes on doing the same. In California, for example, the state with more registered vehicles than anywhere else in the country

Battery Energy Storage Systems (BESS) enable energy from renewable energy sources, like solar and wind, to be stored and released when customers need power. Even if the wind isn't blowing or the sun isn't shining, battery storage enables utilities to continue to provide power during peak demand. Here's how it works: 1. CHARGE

See the article below for an exclusive Q& A session about the Burt County solar-plus-storage project featuring Mitch Hyde, Bluestem's Director of Operations and Maintenance, and Josh Moenning, Bluestem Energy Advisor and Mayor of Norfolk, Nebraska. Original Article: Norfolk Daily News
