

Who is Bluewater Energy?

Bluewater Energy provides focused technical services to the energy and industrial marketplace from facility or program conception, startup & commissioning to long term operation. Bluewater understands your business and provides strategic solutions that give you a competitive advantage.

What services does Bluewater provide?

The company also provides operational and logistic management and support for FPSO and FSO systems. Since 2006 Bluewater has developed various technologies for renewable energy.

Who is Bluewater mooring & energy production?

At Bluewater we use our decades of experience to provide safe and reliable offshore solutions. We take pride in being one of the technological leaders for offshore mooring and energy production systems. We take care, think dynamically, are inspired to make impact and are committed to deliver.

What mooring systems does Bluewater offer?

Bluewater has developed some of the most innovative SPM solutions, including catenary anchor leg mooring (CALM) buoys and tower, internal and external turret mooring systems. Bluewater's tidal energy converter (BlueTEC) is an open-architecture floating support platform suitable for tidal turbines.

What is Bluewater tidal energy converter?

Bluewater has developed a system to produce electrical power near-shore by harvesting tidal energy with a floating tidal energy converter. Building on our decades of experience in mooring and transfer systems offshore, we have successfully designed and field demonstrated a floating, tidal energy converter "Bluetec".

Bluewater Energy did a great job installing the system, in fact they stepped in when the first company I hired went bankrupt and got my system installed on time and on budget. It was a truly remarkable feat. They really are a professional outfit, the best in the business. I can't say enough about solar power, and Bluewater Energy.

About Bluewater Energy Services B.V. Since its foundation in 1978, Bluewater has built a technological lead specialising in design, development, lease and operation of tanker-based production and/or storage (FPSO, FSO) systems, and has become a leading provider of innovative Single Point Mooring (SPM) systems. The company has designed

Bluewater Energy Services | 31,197 followers on LinkedIn. Bluewater specializes in the design, lease, ownership and operation of Floating Production Storage and Offloading (FPSO) vessels; and the design and supply of advanced turret mooring systems and CALM Buoys. For offshore renewable energy production, Bluewater has developed a Floating Wind TLP, a Tidal Energy ???

To be globally recognised in the energy sector as an independent, world-class provider of innovative, solid technologies and reliable and safe services. Mission Bluewater will employ and develop the best people in order to provide innovative, solid and cost-effective solutions in all areas of its business, ensuring steady growth, financial

Bluewater offers a standard and field proven Turret Buoy design, enabling shortest delivery times at lowest costs. the transfer of compressed hydrogen and CO2 utilizing CALM buoys whilst an E-power buoy is available to support the energy transition. Alternative terminals are conventional or Multi-buoy Mooring (MBM) and Single Arm Leg Moored

We are committed to direct our innovative power to energy efficient and emission-less production and transfer of energy offshore. This includes solutions for renewable energy and existing energy related solutions to give answer to the ???

The Aoka Mizu is the seventh Bluewater designed, built, owned and operated Floating Production Storage and Offloading (FPSO) installation. It is currently on contract to Hurricane Energy plc for the early production system (EPS) on the Lancaster field, west of Shetland.
