The Solar System [d] is the gravitationally bound system of the Sun and the objects that orbit it. [11] It formed about 4.6 billion years ago when a dense region of a molecular cloud collapsed, forming the Sun and a protoplanetary disc. The Sun is a typical star that maintains a balanced equilibrium by the fusion of hydrogen into helium at its core, releasing this energy from its ???

Bandit singing to Bluey in the toilet. It's ridiculous, but accurate. Bluey is desperate to avoid having to go back to bed, and Bandit is trying to parent while half asleep.
