

Who is responsible for alternative energy in Bolivia?

This brief benefited from valuable comments by the following reviewer: Raúl Villarroel Barrientos, Responsible for Alternative Energy, Ministry for Hydrocarbons and Energy, Bolivia. This publication and the material featured herein are provided "as is", for informational purposes.

What is the framework for electricity generation in Bolivia?

The framework for electricity generation in Bolivia is the 1994 electricity law (Law 1604). It empowers the federal government to set a minimum participation for hydropower in the electricity system. A new electricity law reflecting the 2009 constitutional changes is under development.

Does Bolivia have a geothermal system?

The 2007 National Development Plan (Decree 29272) aimed at installing 120MW geothermal capacity, although that goal was not pursued. The framework for electricity generation in Bolivia is the 1994 electricity law (Law 1604). It empowers the federal government to set a minimum participation for hydropower in the electricity system.

Why is jurisprudence still important in Bolivia?

Jurisprudence is still being built on distribution of responsibilities in areas of overlap. Bolivia has a target to deploy 183 MW of renewable electricity by 2025, as set by the 2014 Bolivia Electric Plan 2020-25.

In Bolivia, it is estimated that solar thermal installations will increase at a pace of around 500 per year across the country. This growth is obviously too slow considering Bolivia's solar potential. ??? Poor access to financing ??? Lack of state incentives (financing, subsidies or tax exemptions).
