

In 2012, Bosnia and Herzegovina established the first solar power plant (SPP) in the site called Kalesija. This solar power plant generates a power of 120 kWh and the panels are distributed over 1200 m². Converted solar energy is sent to the Electric Power Industry of B& H. Its annual production counts 150,000 kWh of electricity.

Two international consortiums plan to invest a total of EUR 160 million in two solar power plants in the municipality of Sokolac in Bosnia and Herzegovina (BiH). At the same time, the Central Bosnia Canton has invited ???

Solar plants have also mushroomed across Bosnia, the only Balkan country that exports electricity. In the southern Herzegovina region, Stolac - the town that pioneered the use of solar energy 12

BOSNIA AND HERZEGOVINA BIG SOLAR ENERGY

Consumption or use of energy in Bosnia and Herzegovina (B& H) is unknown, although data on the annual consumption of about 140 PJ can be found. water currents and solar energy for generating electricity are the most present, and biomass for the production of conventional forms of biomass such as fire wood, but recently also of fine shapes

Bosnia and Herzegovina adopted a National Environmental Action Plan, which provides action path to address the major environmental issues of the country. In the energy sector the target will be achieved by increasing energy efficiency and usage of renewab

"This natural synergy creates a strong partnership that allows us to jointly implement new technologies, exchange experiences, and educate our engineers, but also it enables a significant joint presence in the European Union market, primarily opening the markets of Germany, Italy, Spain, Portugal, Belgium, the Netherlands, and Luxembourg for Energoinvest," Ustamujic said.

BOSNIA AND HERZEGOVINA BIG SOLAR ENERGY

- Electricity export revenue in Bosnia and Herzegovina came in at EUR 240 million in the first three quarters. Renewables. State obstructs use of solar energy by households, firms in BiH. 30 August 2024 - Decarbonization is being obstructed by legislators and power utilities,

In terms of the development of geothermal energy in Bosnia and Herzegovina, two major projects were carried out in Bosnia and Herzegovina by the GEOTest, a.s. and GEOTEST d.o.o. Sarajevo. The first one was related to geological exploration and the provision of geothermal energy for the heating of primary school in ? evarlije, in Doboje municipality.

Recently, solar and wind power plants have emerged but remain a small percentage of the overall energy mix at about 6 percent. According to a study conducted by the German government, BiH could generate up to 2000 MW of wind energy per year, primarily in the areas of Livno, Tomislavgrad, Mostar, and Trebinje.
