Bosnia and Herzegovina is a self-sufficient, net exporter of electricity. However, its energy sector relies mostly on fossil fuels, in addition to hydro and a negligible level of renewables. Bosnia and Herzegovina is well endowed with renewable energy resource potential; however, the sector is still in its initial stage of development.

Two international consortiums plan to invest a total of EUR 160 million in two solar power plants in the municipality of Sokolac in Bosnia and Herzegovina (BiH). At the same time, the Central Bosnia Canton has invited ???

Solar Market Outlook in Bosnia and Herzegovina
Bosnia and Herzegovina's energy sector has
endured significant loss due to the low energy
efficiency standards in the past. This was the case
with both residential and commercial buildings,
which resulted in the country's high energy
expenditure. As part of the country's economic
transition, they are also looking at switching to ???

In Bosnia and Herzegovina, which only recently got its first utility-scale solar power plant, coal and power producer EPBiH is gradually shaping its energy transition projects. It is focusing on photovoltaics, just like the other two state-owned power companies, with an ambition to set up clean alternatives.
