

Bosnia and Herzegovina recorded only 107 MW of installed solar capacity at the end of last year, according to the latest data published by the International Renewable Energy Agency (IRENA). But Sher said he believes our country is ready for more solar energy because it has "strong" potential due to its climate.

Bosnia and Herzegovina is a self-sufficient, net exporter of electricity. However, its energy sector relies mostly on fossil fuels, in addition to hydro and a negligible level of renewables. Bosnia ???

## SISTEMA AISLADO SOLAR

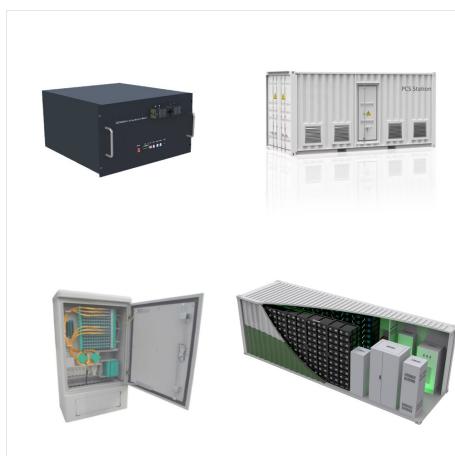

**SOLAR®**

Specifically for Bosnia and Herzegovina, country factsheet has been elaborated, including the information on solar resource and PV power potential country statistics, seasonal electricity generation variations, LCOE estimates and ???

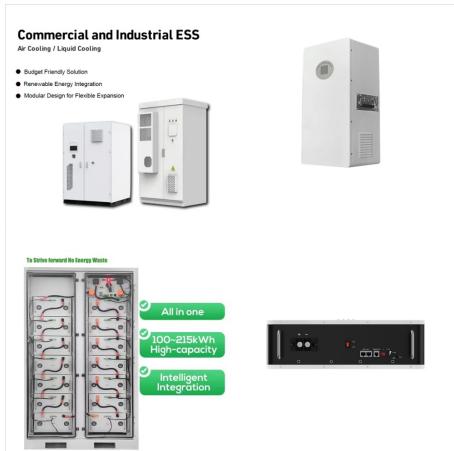

In Bosnia and Herzegovina and the Republic of Srpska up to date none PV solar plant has been installed. Currently, the use of grid connected PV systems in Bosnia and Herzegovina comes down to isolated cases installed in public buildings (orphanage, schools???) with demonstration and training purposes.

Solar energy is a promising sector in Bosnia and Herzegovina, with huge untapped potential. While the sector faces numerous challenges, the recent regulatory improvements coupled with the country's abundant sunlight ???
