In May 2023, Form Energy broke ground on Form Factory 1, its first high-volume manufacturing facility in Weirton, West Virginia, at the site of the former steel plant. A year later, the company completed the construction of the 550,000-square-foot facility, installed new manufacturing equipment, and initiated trial production of its iron-air

As reported in Energy-Storage.news, Form Energy also broke ground on its first iron-air battery that's being built in collaboration with GRE located in Cambridge, Minnesota. The 1.5MW/1,500MWh long-duration energy storage (LDES) pilot project is expected online towards the end of 2025.

The energy storage project is expected to be in operation at the end of 2023 in Cambridge, Minnesota. It will be the first commercial deployment of Form Energy's proprietary multi-day energy storage technology. The value of multi-day storage. Energy storage has the potential to solve challenges posed by the variable nature of the most common
