

How many kW can a solar inverter handle?

AC power outputs range from 3 to 5 kW but the solar inverter is capable of handling up to 8 kW to store any surplus energy generated by your solar PV system on a temporary basis. Adding a Fronius Symo Hybrid to your solar PV system will allow you to maximise your generation and make your property more self-sufficient.

What types of solar inverters are available?

The range includes string and micro inverters. String inverters convert power generated from all of the solar modules in the system at the same time. Details of the Fronius Symo string inverters can be found below.

How much do Fronius solar inverters cost?

Fronius solar inverters can be purchased for between €855 to €2,000 depending on the range and model that's best suited to your solar PV system. To find out which model you should have installed, we highly recommend getting the expert advice of an MCS certified (or equivalent) installer.

Which solar inverter should I Choose?

Thanks to SuperFlex Design, an inverter in the Fronius Symo range is the ideal choice for solar installations on unconventionally-shaped roofing. The range includes string and micro inverters. String inverters convert power generated from all of the solar modules in the system at the same time.

Do I need a micro inverter for my solar PV system?

Micro inverters, on the other hand, are connected to individual solar panels so you'll need one for each solar module in your solar PV system. How much do Fronius solar inverters cost? Fronius solar inverters can be purchased for between €855 to €2,000 depending on the range and model that's best suited to your solar PV system.

Do you need a solar inverter?

Solar inverters are highly efficient and adding one to your solar PV system allows you to get even more out of your investment into solar energy. Available in a range of power categories from 1.5 kW up to 3.1 kW, the Fronius Galvo is suitable for a range of solar systems in homes with a single-phase electricity supply.
