

What is the business environment like in Laos?

The international business community that is present in Laos consists mostly of private or state-owned businesses from China and other Southeast Asian countries; that is, economic actors accustomed to and with experience in the kind of informality and limited predictability that characterizes the business environment in Laos.

How innovative is Laos?

Laos is extremely innovative in its policy formulation. The main policy instruments are strategy documents, visions and plans. These are all subject to extensive consultations at district, provincial and national levels and with international stakeholders.

What is Lao's main priority in natural resource management?

The government's main priority in natural resource management is economic growth. Reflecting a general tendency within the Lao economy, the country recently witnessed an expansion of hydropower and mining, together accounting for 21% of economic output in 2021.

Does Laos still have electricity?

Countrywide electrification is a success story, reaching 100% coverage in 2020 (from 94% in 2017; in 1995, only 15% of Lao households had access to electricity). Health care and education have improved as well, albeit with considerable setbacks due to the COVID-19 pandemic, especially in rural areas.

Is tax administration still a barrier to commerce in Laos?

Tax administration is still considered one of the biggest barriers to commerce in Laos. Firm registration procedures and operating licensing requirements can be expensive and time-consuming.

What does regional integration mean for Laos?

More generally, regional integration implies navigating between the political and economic interests of Laos' powerful neighbors China, Vietnam and Thailand. All three countries appear to agree on infrastructure investments in Laos for regional connectivity.

btI re n l e energy 2022/2023 . hydro 02??????
 solar energy potential 75.000 mw installed capacity
 4.186 mw potential installed capacity 6.2 mw
 biomass potential 49.810 mw 4.80kwh /m2/day
