

Where is a solar power station located in Burundi?

The power station is located in the settlement of Mubuga, in the Gitega Province of Burundi, approximately 15.2 kilometres (9 mi), northeast of the city of Gitega, the political capital of that country. This power station is the first grid-connected solar project developed by an IPP in Burundi.

How many people were hired to operate Burundi's solar power station?

Another estimated 25-50 people were hired to operate the power station. In May 2023, Evariste Ndayishimiye, the president of Burundi toured the solar farm and personally gave his approval for the power station's capacity to be expanded to 15 megawatts.

What is GigaWatt Global Burundi's Power Purchase Agreement (PPA)?

A 25-year power purchase agreement (PPA) governs the sale of electricity between Gigawatt Global Burundi SA and REGIDESO. The engineering, procurement and construction (EPC) contractor was Voltalia of France, which was also awarded the operations, management and maintenance contract.

# BURUNDI SOLARPLAZA SUMMIT ENERGY STORAGE

This pioneering solar project, proudly supported through UK international climate finance, has increased Burundi's generation capacity by over 10% and is helping propel the country towards a cleaner and more sustainable energy future."

Burundi has officially inaugurated the country's first utility-scale solar field, as part of push to leverage renewable energy for improved access to electricity for homes and businesses. The grid-connected 7.5MW solar power plant, located in Mubuga, became operational in 2021.

The 7.5 megawatt solar farm increases Burundi's generating capacity by 10%, representing the first substantial energy generation project in the country in more than 30 years. Financing for the project was provided by the UK's Renewable Energy Performance Platform, pan-African private equity investor Inspired Evolution, and Gigawatt Global.

# BURUNDI SOLARPLAZA SUMMIT ENERGY STORAGE

Burundi has officially inaugurated the country's first utility-scale solar field, as part of push to leverage renewable energy for improved access to electricity for homes and businesses. The grid-connected 7.5MW solar power plant, located in ???

The Mubuga Solar Power Station is a grid-connected 7.5 MW solar power plant in Burundi. The power station was constructed between January 2020 and October 2021, by Gigawatt Global Co?peratief, the Netherlands-based multinational independent power producer (IPP), through its local subsidiary Gigawatt Global Burundi SA.

The inaugural Solarplaza Summit Net Zero Buildings directly addresses this opportunity. With growing demand for sustainable, energy-positive buildings, this sector is ripe with potential. potential. The event showcases real-world business cases focusing on ROI, cutting-edge technologies (plug-and-play, energy storage, BIPV), and exclusive

President Ndashimiye of Burundi announces the intention to double the country's solar capacity during the ribbon-cutting ceremony for Burundi's first solar field. Explore the significance of this commitment to renewable energy expansion and its implications for Burundi's sustainable development.
