

What is Castrol Edge and Syntec Power Technology?

Castrol EDGE is an advanced full synthetic motor oil with a unique and proprietary formula. It contains Syntec Power Technology, which reduces friction for maximum engine performance. This technology provides superior protection for critical engine parts, helping your vehicle operate efficiently at power.

What is the difference between Castrol Edge & FST technology?

Castrol EDGE with SYNTEC Power Technology and Castrol EDGE with Titanium FST Technology are both high quality synthetic oils. The Titanium FST Technology product is referred to as the "most advanced oil" in part because it contains a new, advanced additive developed by the Castrol Technical group that contains Titanium.

What is Castrol Edge with titanium FST?

Castrol EDGE with Titanium FST contains a significantly different base oil mixture and additive package than Magnatec. Castrol EDGE with FST is our top premium full synthetic motor oil formulation with specific additives that not only has passed US standards but also the tougher European ACEA specifications for engine protection.

Are the Castrol Edge formulas the same as the European version?

The Castrol EDGE formulas are not the same as the formulas used in the European versions of EDGE. All of our synthetic oils are blended with highly refined synthetic base oils to give the improved performance of a synthetic motor oil.

Does Syntec outperform conventional motor oil?

For years, you've depended on the power of Castrol SYNTEC to outperform conventional motor oils. Now, we've reformulated SYNTEC to outperform even itself. In extreme tests, Castrol EDGE with SYNTEC Power Technology maintained maximum horsepower 30% longer than Castrol SYNTEC.

What is Castrol Magnatec?

Castrol Magnatec is a strong performing partial synthetic formulation that has been specifically designed for outstanding wear protection. Both Edge with Titanium FST and Magnatec have proven to give excellent wear
