

How do I buy solar panels?

How you choose to buy solar panels depends on your financial situation and your savings goals. Paying cash is the simplest way to buy solar panels and offers the greatest return on investment. Cash purchases are typically made in 3-4 installments. For example:

Are DIY solar panels worth it?

One of the primary appeals of DIY solar panels is that you can save money. According to EnergySage, solar panels cost an average of \$29,410 for a 10- kilowatt (kW) system. Roughly half of that cost goes toward labor, overhead, margin, customer acquisition, and other costs that do not apply to a DIY solar power installation.

Is it cheaper to build your own solar panel system?

Yes, it's cheaper to build your own solar panel system. Since you don't have to pay for labor and other overhead costs, you could save \$5,000 or more with a DIY system. However, installing solar panels is a complicated process with many possible mistakes, and you may have less access to cost-saving solar incentives.

How much does DIY solar cost?

When you DIY solar, you can do so with either a solar panel kit, or from scratch. Solar panel kits range in price; a 6kW system can cost anywhere from \$7,000 - \$18,000 before the 30% federal tax credit. However, this doesn't include permitting costs or installation, which would be included if you work with an installer.

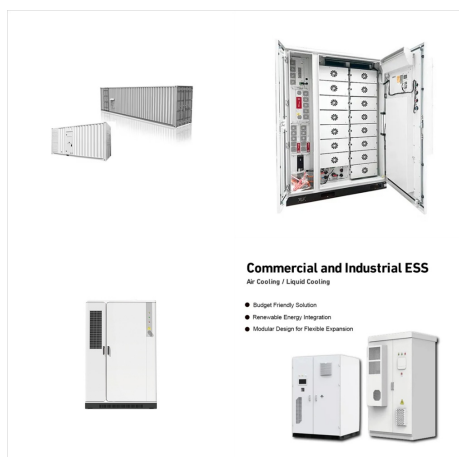

Can you install solar panels on your own?

It's possible to install solar panels on your own, but DIY solar installation requires serious know-how and tools. Some solar companies design solar panel kits targeted toward DIYers. However, these kits are often meant for small builds, such as converting a shed, RV, or boat. Installing a solar energy system requires knowledge of electrician work.

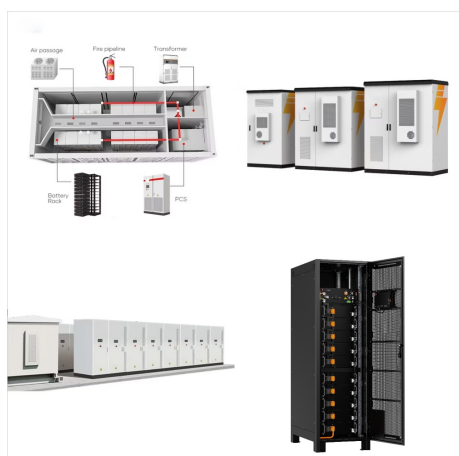

Should you buy a do-it-yourself solar panel kit?

If you want to take a small step toward using solar energy, or if you want to extend the solar power you're already using, a do-it-yourself (DIY) solar panel kit could be a good way to avoid professional installation labor

costs and take advantage of solar power.
