A solar energy system will likely increase a home's value. A DOE-funded study at the Lawrence Berkeley National Laboratory found that solar panels are viewed as upgrades, just like a renovated kitchen or a finished basement, and home buyers across the country have been willing to pay a premium of about \$15,000 for a home with an average-sized solar array.

Using solar energy can significantly reduce or even eliminate your electricity bills. However, the upfront cost of a new solar system can be daunting. This is where used solar panels offer a compelling solution. Buying used solar panels can cut your initial investment by 50-80% compared to new panels.

If you prefer to buy your solar energy system, solar loans can lower the up-front costs of the system. In most cases, monthly loan payments are smaller than a typical energy bill, which will help you save money from the start. Solar loans function the same way as home improvement loans, and some jurisdictions will offer subsidized solar energy
