Leonardo David is a writer and energy consultant who has worked on projects funded by the Inter-American Development Bank.

Does California have solar power?

California is a national leader in the solar industry. This should be no surprise since the state has more sunny days than most other states nationwide. It ranks fifth in the country for most annual sunlight. Consequently, over 29% of the state's electricity comes from solar power.

Are solar panels worth it in California?

Installing solar panels in California can significantly reduce your home's electricity costs and provide energy independence during grid outages. Given the state's high electricity rates, abundant sunshine and strong state-specific incentives, the investment in solar panels is often considered worth it.

Why are solar stocks a bearish investment?

The high-interest rate environment made a bearish case for solar stocks throughout the year due to a demand drop among retail customers. Moreover, California's Net Energy Metering 3.0 policy has reduced incentives for rooftop solar owners drastically.
