

Who is Building Cambodia's New 135MW power plant?

The new 135MW plant is being built as part of an Independent Power Producer (IPP) project secured by Leader Energy in 2016. The power station will be built-owned-operated for a tenure of 30 years by Cambodia Energy Limited II(CEL II),a project company set up by Leader Energy.

Who owns Cambodia's new thermal power plant?

The power generated from the plant will be bought by Cambodia's state-owned energy utility Electricite du Cambodge(EDC). The new plant is expected to be the cleanest and most efficient thermal power plant in Cambodia. The new 135MW plant is being built as part of an Independent Power Producer (IPP) project secured by Leader Energy in 2016.

What role does China play in Cambodia's energy sector?

China's role in Cambodia's energy sector is now so extensive that, as of 2018, almost three-quarters of the domestic power supply came from Chinese-built and financed power plants (Mao and Nguon 2018).

What is Cambodia's first coal-fired power plant?

The 100 MW power station was commissioned in 2014. It was Cambodia's first coal-fired power plant. Starting when it was first proposed in 2008, the plant faced strong opposition from local residents over its environmental and health effects.

Will Cambodia build a hydropower dam in the Areng Valley?

On February 20, 2017, the Cambodian government said it was indefinitely putting off plans for a hydropower dam in Koh Kong province's Areng valley in favor of expanding the 100 MW Sihanoukville CEL power station by 135 MW.

What's going on with hydropower in Cambodia?

Two trends are at play here: increasing reluctance to launch new hydropower projects, and a turn to coal power to expand energy production. Hydropower projects in Cambodia have been controversial and have met with resistance from local people and environmental groups.

China-Cambodia ties have received a boost from
Chinese investments in Cambodia's new energy
industry. The Cambodian Confederation of Investors
Association hosted an event in Phnom Penh to
welcome these new investments. Fu Xin-ri reports
from Cambodia.

With Cambodia previously relying on hydropower for
around 50 per cent of its energy needs, the drought
of 2019 exposed the country's vulnerability in
meeting domestic power demand. As a
consequence, several coal-related projects that had
been under lengthy study over the previous few
years were given a boost.
