

Passengers should notify flight crew immediately if their lithium battery or device is overheating, expanding, smoking or burning. Spare (uninstalled) lithium ion and lithium metal batteries, including power banks and cell phone battery charging cases, must be carried in carry-on baggage only.

All lithium batteries must comply with the requirements of the UN Manual of Tests and Criteria, Part III, Section 38.3. However, if you do carry with you electronic devices or batteries that are not permitted for transport, you risk the items being confiscated from you at the airport.

CAN I TAKE LITHIUM BATTERIES ON A PLANE

Spare (uninstalled) lithium metal batteries and lithium ion batteries, portable rechargers, electronic cigarettes and vaping devices are prohibited in checked baggage. They must be carried with the passenger in carry-on baggage.

Lithium ion batteries installed in a personal electronic device can be transported as checked or carry-on baggage. Lithium ion batteries not installed in a device (spares) must be in carry-on baggage and no more than two (2) spares between 100 and 160-watt hours are allowed.

Carry On Bags: Yes (Special Instructions) Checked Bags: No. Spare (uninstalled) lithium ion and lithium metal batteries, including power banks and cell phone battery charging cases, must be carried in carry-on baggage only.

Can I bring rechargeable lithium batteries on a plane? What do I need to know about flying with lithium batteries with 100 watt hours or more? What are the TSA rules regarding batteries? Can I bring a power bank or charger on a plane?

SOLAR°
