

Should you buy a do-it-yourself solar panel kit?

If you want to take a small step toward using solar energy, or if you want to extend the solar power you're already using, a do-it-yourself (DIY) solar panel kit could be a good way to avoid professional installation labor costs and take advantage of solar power.

Can I install my own solar panels?

Installing your own solar panels is doable for some, but it comes with a long list of caveats. Before you take the DIY leap, you'll need to take into account whether it's even possible to install your own system. Here are some things to keep in mind when evaluating whether or not it's achievable for you.

Are DIY solar panels a good idea?

The short answer is: yes! However, it's not really that simple. DIY solar panels may sound like sweet relief for your wallet, but there are a few things to consider before you invest in a home solar kit. Learn more about the differences between installing solar panels yourself and hiring a solar installer.

Is a DIY solar installation worth it?

Given a DIY solar installation will only save you 10%, the equipment alone can make hiring a solar installer worth it. Most homes with solar panel systems aren't "off-grid," even if they only use the electricity produced by their panels.

Is a do-it-yourself solar panel installation worth it?

While solar saves you money in the long run, that initial five-figure bill can give pause to anyone. If you find yourself looking for creative solutions to cut costs, you're not alone. A do-it-yourself (DIY) solar panel installation may be tempting, but it could cost you more in the long run.

How much does DIY solar cost?

When you DIY solar, you can do so with either a solar panel kit, or from scratch. Solar panel kits range in price; a 6kW system can cost anywhere from \$7,000 - \$18,000 before the 30% federal tax credit. However, this doesn't include permitting costs or installation, which would be included if you work with an installer.

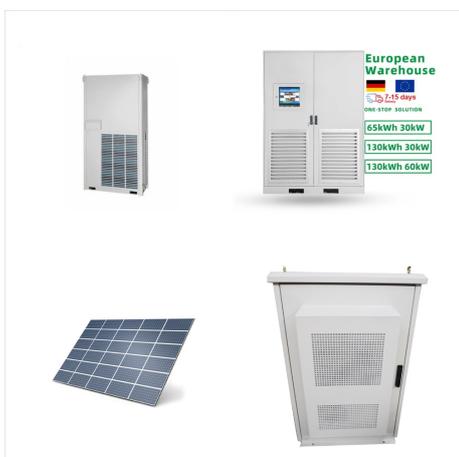

# CAN YOU BUY SOLAR PANELS AND INSTALL THEM YOURSELF

Installing solar panels yourself is not advised, that said, DIY if you know what you're doing, can save a lot of money. The fact there's almost no value in second-hand solar panels is bad news for them and good news for you.
