

The Backup-Mobile UPS is designed to keep your equipment from losing power or rebooting during engine start-up, ensuring these spikes and sags in power don't shorten the life of your mission critical electronics. We do this by providing uninterrupted, clean, consistent power to your equipment, extending the life of your electronics up to 2 to 3 more years.

What to Look For in an Uninterruptible Power Supply (UPS) Many smart devices have built-in battery packs, with modern laptops packing enough cells to last a whole day. However, typical desktop computers, routers, and similar devices still need to be plugged into a power source all the time to work. That's where an uninterruptible power supply (UPS) ???

If you use devices that consume less power, your car battery can last longer. But, if you don't drive between charges, you can also completely drain your car's battery, so be cautious and use car power wisely during outages. Advantages of a Using Car Battery as a Power Source. Car batteries can be lifesavers during power outages or emergencies.
