

What is the Carrera GO Transformer used for?

The Carrera GO transformer is used for powering Carrera GO Plus connection sections and GO power bases that have only one transformer plug input. It's also used for upgrading a newer Carrera GO battery operated race set (that comes with a solid red battery cover on the power base) to transformer power. Rated at 14.8 volts, 10.4 VA. US plug.

Do I need an adapter to plug into Carrera's digital and analog systems?

***This is an aftermarket transformer, you will need an adapter to plug into Carrera's Digital and Analog systems, please see the related products below to choose the appropriate adapter. .. Very well filtered and regulated clean DC Output

Are Carrera slot cars realistic?

For both beginners and experienced racers, Carrera slot car tracks and cars provide the most realistic racing action. Carrera makes the dreams of racing drivers come true - however old, however young! Whether you're racing against family or friends, one thing's for sure is that there'll be hours of fun for everyone!

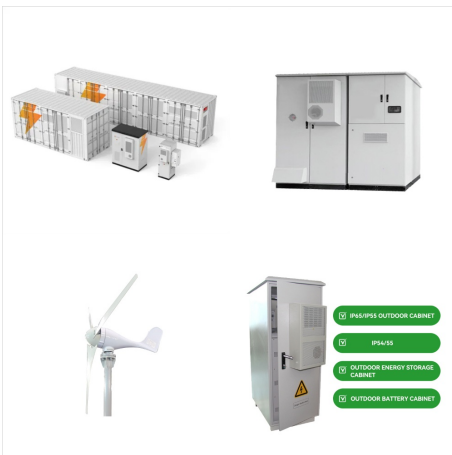

If you have a Carrera Digital Race track (or purchase the digital components) you can now change between Carrera's Digital and Analog 124/132 Scale Track Systems with the flip of a switch! No need to chip your old analog cars, change out controllers, transformers or power bases in order to race both.
