The power generated by the solar panels connects directly into the electric utility feed. In Cayman Islands, this process is called the CORE program. Inverters: Grid-Tie Inverters (interties) convert DC power from PV modules into AC power to be fed into the utility grid. There are two major types of grid-tie inverters: string and micro inverters.

Environmental Benefits: Solar energy is a clean and renewable source of power that produces no harmful greenhouse gas emissions or contributes to air pollution. Switching over to solar can significantly reduce your carbon footprint and help combat climate change, not only for yourself but for the entire Cayman Islands too.
