DC or direct current power supplies usually come in budget-friendly security camera systems. This power supply option is a wired connection that involves the owner plugging a small transformer into a standard 120v power outlet.

However, Uninterrupted Power Supply (UPS) is used more often as compared to other power sources. UPS is basically a surge protector that has a built-in backup battery for your security cameras and DVR. It can power multiple devices and is a great way to protect your surveillance equipment from power line surges.
