

Over the last few years, there were numerous announcements from domestic and foreign companies on the construction of utility-scale solar power facilities, but this is the first one that was actually installed.

Solar energy is a promising sector in Bosnia and Herzegovina, with huge untapped potential. While the sector faces numerous challenges, the recent regulatory improvements coupled with the country's abundant sunlight resources create a favorable environment for investment.

Western Balkans Competitiveness Outlook 2024: Bosnia and Herzegovina Renewable energy capacities installed in Bosnia and Herzegovina (2020-23) Inclusive and sustainable economic growth in the six Western Balkan (WB6) economies depends on greater economic competitiveness.

CELDAS SOLARES INDUSTRIALES BOSNIA AND HERZEGOVINA

The existence of prosumers would certainly give an extra push in making an investment decision. It is also important to note that Bosnia and Hercegovina has among the lowest electricity prices in Europe, and it is only possible to expect increase in prices, especially for households.
