The unique design conveys Absen's confidence in its display expertise and product quality. The NX series adopts a 16:9 golden ratio design to improve viewing comfort, and has a variety of pixel pitches to provide customers with more high-definition options.

Energy intensity can therefore be a useful metric to monitor. Energy intensity measures the amount of energy consumed per unit of gross domestic product. It effectively measures how efficiently a country uses energy to produce a given amount of economic output. A lower energy intensity means it needs less energy per unit of GDP.

South Africa, the undisputed African solar leader. With an estimated 7,781 MW of solar (not including residential installations) by the end of 2023, the country hosts almost 50% of all installed capacity in the continent and is by far the leading country for solar in Africa. This domination is true for both historical installations as well as for 2023 activity.
