

How do I Choose an inverter?

The inverter is designed to momentarily provide the rated high demand (e.g., surge power) before returning to the inverter's continuous power rating. When selecting an inverter, ensure that the total power needed for all devices to be connected to the inverter is below the continuous (first) power rating of the inverter.

What is a power inverter used for?

This power inverter lets you run power tools, small appliances and electronics during a camping trip, roadside stop or power outage by using your vehicle's battery. This power inverter features a high surge capacity for products that require power up to 4000 watts to start and an LED readout to monitor amps and voltage. Not for marine use.

Can a power inverter be used for marine use?

This power inverter features a high surge capacity for products that require power up to 4000 watts to start and an LED readout to monitor amps and voltage. Not for marine use. Use only with 12v deep cycle lead-acid batteries rated for RV use. To preserve battery life do not discharge battery below 50% charged state.
