## How much does a smartflower solar panel cost?

Now,let's talk about the numbers. How much does the SmartFlower cost? Before applying for all incentives and tax credits,the SmartFlower solar panel system ranges in price from \$25,000 to \$30,000with the average cost to install at \$27,000. There are two models that you can choose from, and this is why the price can vary.

How much does a solar panel system cost?

The best way to compare solar panel system prices is to determine the electricity generation cost per watt. The cost per watt for a Smartflower is anywhere from \$6.25 to \$7.50, with an average price of about \$6.75, assuming that it is equivalent to producing a 4 kW fixed rooftop array.

What is a smartflower Solar Flower?

The Smartflower solar flower is an all-in-one ground-mounted solar system with a tracker that follows the sun. However, it doesn't look like the solar panels you might be used to. Learn all about the product, how it compares to other solar options, and whether you should consider one for your home in our Smartflower solar review.

Where is smartflower Solar Flower installed?

However, it has been installed at a handful of U.S. houses and organizations like the Detroit Zoo and Mary Baldwin University. The U.S. division of Smartflower is currently based in Boston, Massachusetts. How is the Smartflower solar flower different from other solar options?

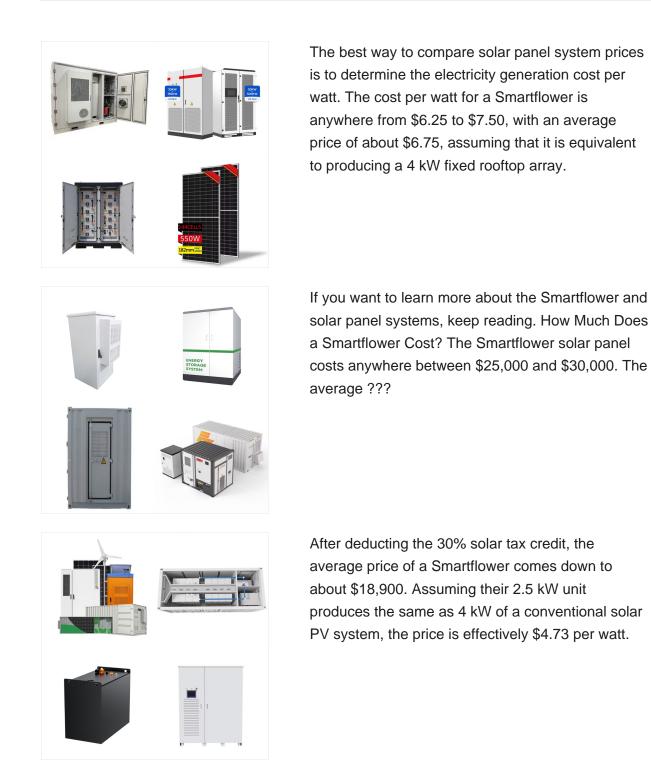

Does a smartflower produce more electricity than a solar panel?

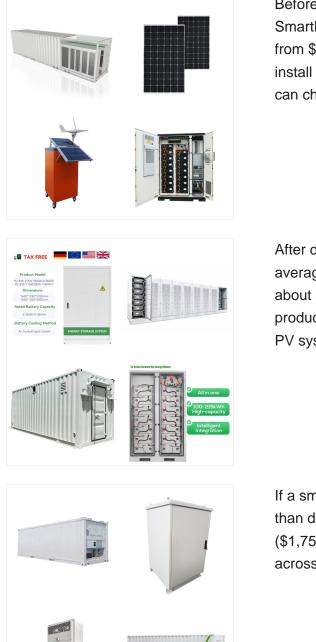

Thanks to this tracking capability, the Smartflower can produce significantly more electricity than a similarly-sized rooftop solar panel system - up to 40 percent more, according to Smartflower's website.

## What is a Flower Solar Panel?

The Flower Solar Panel, specifically the Smartflower system, is a ground-mounted solar panel known for its stunning design. Its unique feature includes petals that fold together and unfold whenever the Sun is out. This solar panel is packed with smart features in its installation, mounting, settings, and repair.

## CHILE SUNFLOWER SOLAR PANEL **SOLAR**<sup>®</sup> PRICE

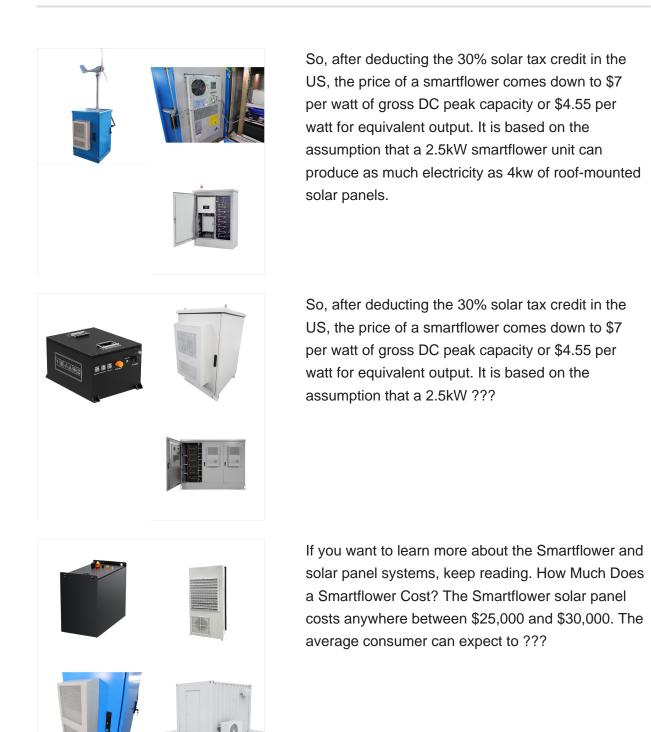

//////

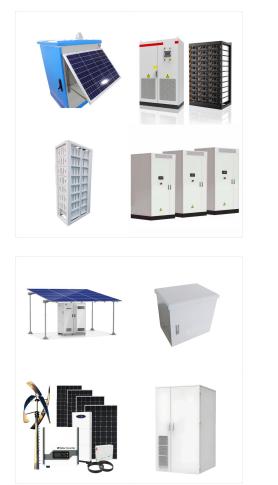

Before applying for all incentives and tax credits, the SmartFlower solar panel system ranges in price from \$25,000 to \$30,000 with the average cost to install at \$27,000. There are two models that you can choose from, and this is why the price can vary.

After deducting the 30% solar tax credit, the average price of a Smartflower comes down to about \$18,900. Assuming their 2.5 kW unit produces the same as 4 kW of a conventional solar PV system, the price is effectively \$4.73 per watt.

If a small turn-key rooftop PV system costs more than double the price in Argentina and Chile (\$1,750/kW) than in neighbor Brazil (\$800/kW) or across the world in distant Australia (\$700/W),

## CHILE SUNFLOWER SOLAR PANEL **SOLAR**<sup>®</sup> PRICE

The best way to compare solar panel system prices is to determine the electricity generation cost per watt. The cost per watt for a Smartflower is anywhere from \$6.25 to \$7.50, with an average price of about ???

If we consider the price per watt for new solar systems is generally in the \$3-\$4 range in 2023 according to national estimates, then a Smartflower system costs between three and four times as
