ESI, Energy Science International LLC develops, and commercializes battery modules of premium quality, reliable, safe, user-friendly, and capable of intelligent control. ESI presently supplies lines of LPP Lithium-ion battery packs for a variety of applications.

functionality available to study battery designs in detail. Built on advanced work in fuel cell development and semiconductor manufacturing, the battery capability available from ESI can help you move your battery development from the laboratory to simulation, giving your team the insight to bring the next critical innovation to market faster.

Acting principally in automotive, land transportation, aerospace and defense, and heavy industry, ESI software enables engineers to simulate mechanical designs, smart manufacturing processes, and human-centric workflows to make better decisions earlier in the product lifecycle.
