All you need to search for is a battery box that you want or is available in your area and then get a lithium battery that has a BMS built in and then a DC to DC charger and then finally a 12v distribution box. Your lithium then goes in the battery box and you can connect your DC to DC charger to it and have it located wherever you want.

I purchased 2 Chins 100ah batteries from Amazon and tore them open hoping to find the prismatic cells that I saw in Will's teardown video. Much to my surprise, and not a great surprise, mine was loaded with pouch cells. The assembly was well put together, and super clean. Also, way less silicone than the Zooms battery I tore apart a few weeks ago.
