

What makes civitas a sustainable company?

Civitas is an industry leader in sustainable operations. We believe that caring for our environment, our employees, and our communities is critical to our role as an energy producer.

Does civitas have a deal with Hibernia Energy & Tap rock resources?

Civitas said Tuesday that it has signed agreements for a total of \$4.7 billion with affiliates of Hibernia Energy and Tap Rock Resources, companies managed by the private equity firm NGP Energy Capital Management. Civitas called the deal transformative, giving it "a stronger, more balanced and sustainable enterprise."

How does Civitas ensure good air quality?

Civitas ensures good air quality through an independent third-party review and rigorous analysis of operations and practices. The company is proud to partner with its vendors to protect air quality in the communities where they operate, and to deliver responsibly sourced gas to their utilities and sustainability-focused customers.

What makes civitas unique?

Civitas was created through the merger of long-standing Colorado oil and natural gas peer companies, and we have since expanded our portfolio into New Mexico and Texas. The strategic combination brought together decades of operational expertise and best practices within the Denver-Julesburg and Permian basins.

How many locations does Civitas have in Colorado?

Civitas has over 200 development locations in Colorado, each equipped with 24/7 real-time air monitoring stations and more than 40 wells that are TrustWell(TM) certified for producing Responsibly Sourced Gas.

How is Civitas delivering on a new E&P business model?

Civitas Resources leadership is actively delivering on a new E&P business model focused on delivering value, returning cash to stakeholders, maintaining a fortress balance sheet, and creating a peer-leading sustainability platform.

Civitas is the first Zero Energy and Zero Carbon building in the world to achieve ILFI certification, and is certified LEED Platinum for Homes. Civitas is a 2798 sf single-family dwelling located on a relatively small, greenfield site on the banks of the Mississippi River in Memphis, Tennessee.

Visions of a greener mobility future. The GreenCharge project, which finished in February 2022, aimed to achieve zero emission transport systems in cities, with systems based on electric vehicles (EV) that run on green energy, with traffic jams and parking problems becoming things of the past. This is an ambitious vision of a greener mobility future!
