

What is a community choice solar project?

By having a large base of default customers with years of service ahead, solar projects can negotiate competitive rates to provide their power. It's opt-out and wide-scale, versus the opt-in nature of community choice projects. Some community choice enrollments also involve renewable energy certificates, which we'll explain next.

What is a community choice solar (CCA)?

What about CCAs? Community choice solar, or CCAs, are not the same thing as a community solar subscription. The major difference is that community choice usually involves automatic enrollment of everybody within a certain area to a solar project, authorized by local governments.

What are the best community solar options?

Over the last month we interviewed renewable energy experts and spent dozens of hours researching the best community solar options on the market. Our pick for the best way to get signed up for community solar is Arcadia, a company that makes signing up for a local solar project feel as easy as ordering takeout.

What is community solar?

Community solar is, at the simplest level, any set of solar panels that offers up the power it generates to more than one person in the area. The goal of community solar projects is to provide clean energy to homes that are currently ineligible for solar.

Why do communities want a community solar project?

Communities may be interested in a community solar project for a variety of reasons, including wanting to reduce pollution in their community, wanting more control over their energy sources, wanting to participate in the financial benefits of clean energy, and/or wanting more jobs or economic development through locally sited clean energy.

Does Arcadia offer community solar?
