

What is a COB LED street light?

The housing of the COB LED street light is integral die-casting. The lamp bead adopts the method of SMD and integrated lens, which has a stronger light concentration. Using imported LED chips and a high-quality LED power supply, the lighting effect and stability of this SMD LED lamp/light series are guaranteed.

What is a COB LED lighting system?

COB LEDs The main component of a COB LED lighting system would obviously be the lights themselves. The term COB stands for "Chip On Board", and refers to the fact that each unit is actually several LED (Light Emitting Diode) chips mounted together on the same substrate, which is often ceramic or metal.

What is COB LED light source?

COB LED light source is appropriate for various outdoor and indoor lighting applications. It can be applied for universal illumination in industrial, residential, architectural and others. For instance, it can be used as street light, spot light, and strip light.

Where can I buy COB LED lights?

If you are ready to dive into the future, check out Light Supplier's collection of COB LED Lighting. One you've made the switch, you'll never go back!
