Considering that, these are priced at \$1 per watt, which is the average price for solar panels -- in other words not a great deal. If you want to build a solar array, you're better off buying the right panels -- 100W, 200W or whatever -- and the right charge controller and do it properly. It costs the same and you'll get better performance.

Edit: Decent flexible panels can be purchased for the price of the Coleman model described in this discussion, albeit without a solar controller. Here is a link to an HQST model that is currently under \$100 (on sale). 100 WATT 12 VOLT FLEXIBLE MONOCRYSTALLINE SOLAR PANEL|HQST Solar (hqsolarpower)

Costco has a 100W solar panel for sale. Thread starter Supervstech; Start date Feb 16, 2022 but from what I've seen most are more expensive than this one. I agree that \$1 per watt is on the high side, but to get lower than that you need to buy something bigger than 100W, right? I've actually used a couple of those Coleman SCC"s. They

Save \$40 on this solar panel. If you're someone who aspires to live off the grid, this might be a deal worth checking into stco has the Coleman 100W solar panel with 7AMP charge controller for \$119.99 ??? a savings of \$40 off the original price.. According to Costco, this solar panel plus charge panel is "ideal for boats, RVs, sheds, cabins or cottages where little electricity is

anywhere in the world. Going into the mountains for
an extended stay, but don't want to live entirely like
a contestant on Survivor? Costco's solar power
products are the solution.

COLEMAN 100 WATT SOLAR PANEL COSTCO

I have a 100watt panel that I pair with a Goal Zero solar generator. On a clear sunny day, I get about 75 watts, but that's typical. That means over the course of an hour, 75 watts are deposited into my goal zero.

If we park in shade, or a string of bad solar days, we too have had the Coleman 100 watt panels (cheap at \$1 watt) from Costco for many years. They work. The chintzy pwm controller onboard ours was not great. We ???
