

You can compare community solar companies based on savings percentage, cancellation terms, credit score requirements, organization affiliations, and ratings and reviews. Some community solar companies include Solstice, Nexamp, Ampion, Arcadia, PowerMarket, Common Energy, Perch Energy, and Clearway Community Solar.

What is community solar?

Community solar is,at the simplest level,any set of solar panels that offers up the power it generates to more than one person in the area. The goal of community solar projects is to provide clean energy to homes that are currently ineligible for solar.

Why do communities want a community solar project?

Communities may be interested in a community solar project for a variety of reasons, including wanting to reduce pollution in their community, wanting more control over their energy sources, wanting to participate in the financial benefits of clean energy, and/or wanting more jobs or economic development through locally sited clean energy.

Is community solar a good option?

Community solar can be a great optionfor people who are unable to install solar panels on their roofs because they are renters, can't afford solar, or because their roofs or electrical systems aren't suited to solar. Community solar is rapidly growing across the country.

What are the benefits of community solar?

Community solar can allow all households and businesses to access the benefits of solar energy, such as lower electricity costs, regardless of whether they're able to host a system on their own roof. And, in areas where solar power is less expensive than fossil-generated electricity (most places), consumers can save money on their monthly bills.

Where can I buy community solar?

Solar United Neighbors has a deeper guide for how to shop for community solar. With that in mind, check out

Solar United Neighbors' search tool. You can see the offerings from major community solar providers in each area, including Nexamp, CleanChoice, Neighborhood Sun, and Arcadia, among others. What's the benefit of community solar for me?

Historically, one of the roadblocks to community solar adoption was onerous programs and contracts. Many community solar programs used to require long-term contracts with hefty cancellation fees. Today, community solar companies frequently offer programs with shorter-term contracts and an easier process for canceling or transferring the agreement.

Community solar programs are not available in every state, and community solar farms each have a limited number of memberships available.

Additionally, community solar subscriptions often come with long-term contracts, which can be as long as 20 years. Some people may also find the billing process for community solar to be cumbersome and confusing.

The investors will only receive a five per cent return for their input, but the tangible impact on the local environment and sustainability is massive. While the Majura project is the largest community solar farm to date, there are many other projects around the country that have been funded by local investors as well.

With community solar, you can buy blocks (% share) in a local solar project up to 100% of your energy use.
