

On 8 July 2024, Chile's largest solar power plant, CEME 1, was inaugurated in an activity led by national authorities and in which participated key stakeholders of the energy sector. CEME 1 is a 480 MW solar plant which was built and will be operated by Generadora Metropolitana, a joint venture between EDF and the Chilean company AME.

Where is a 480 MW solar plant being built in Chile?

From pv magazine Latam PowerChina Chile,Renewable Energy - a unit of energy and infrastructure developer PowerChina - has finished building a 480 MW solar plant in María Elena,in Chile's Antofagasta region. Claudio Araya Aguilar,the company's head of human resources and labor relations,announced the plans on LinkedIn.

What is Chile's largest solar farm?

Claudio Araya Aguilar, the company's head of human resources and labor relations, announced the plans on LinkedIn. He said that the facility he manages is now Chile's largest operational solar farm. The company built the plant with 882,720 panels provided by an undisclosed manufacturer, on a plot of land spanning 435 hectares.

Does Chile have a solar thermal tower?

Chile's Atacama desert is home to the only solar thermal tower in Latin America. The imposing 240-meter construction is one of the pillars of the country's ambitious green energy program that began in 2019 and aims to completely replace fossil fuels by 2040.

Who is Repsol Ibereólica Renovables Chile?

Repsol Ibereólica Renovables Chile,a company owned 50% each by Repsol and the Ibereólica Renovables Group,has started producing electricity into the grid from its first joint solar project in the Andean country with the start-up of the first phase of the Elena photovoltaic plant,which will have a total installed capacity of up to 596 MW.

French Group EDF and its Chilean partner AME, in their 50% joint venture called Generadora Metropolitana, obtained financing for an amount of 980 million dollars. The proceeds will be used for the construction of the CEME1 solar plant (in Maria Elena, Antofagasta Region) with a capacity of 480 MWp, the conversion to gas of the

Un informe de Chile Sustentable arroj? que de las 28 centrales a carb?n que operaban en 2019, cuando se inici? el cronograma de descarbonizaci?n, ocho termoel?ctricas est?n cerradas, 12 est?n con compromiso de cierre al 2025 y ocho carboneras no tienen compromiso de cierre y podr?an operar hasta el a?o 2040.. Bajo ese contexto, en abril de ???
