

Should you buy growth stocks in 2023?

Growth stocks rebounded in 2023, outpacing the overall market through mid-2024. High inflation and supply chain issues pressured growth stocks but downturns offer buying opportunities. Investing in companies with strong competitive advantages and large addressable markets is recommended.

Are growth stocks outperforming value stocks?

Nevertheless, growth stocks have outperformed value stocks since the beginning of 2023, and investors anticipate that trend will continue as the Federal Reserve cuts interest rates. Here are 10 of CFRA analysts' top growth stocks that have reported at least 15% annual revenue growth in the past three years: *From Oct. 18 closing price.

What are the growth prospects for a company based on a strong backlog?

The company has solid growth prospects supported by a strong backlog and order bookings, secular demand trends in its commercial end-market, good execution with quickly pivoting focus to higher growth verticals, market share gains in the transportation refrigeration business, and inorganic growth from M&As.

Did growth stocks have the upper hand in 2023?

Growth stocks had the upper hand in 2023: The Morningstar US Growth Index outperformed the Morningstar US Value Index by more than 26 full percentage points for the year. But the early gap in 2024 year-to-date returns has disappeared as value stocks have outperformed. What does this reversal mean for growth stocks?

Should you buy growth stocks in 2022?

The key, of course, is to know which growth stocks to buy and when. Many growth stocks suffered major losses in 2022. While the S&P 500 index crashed more than 19%, the S&P 500 Growth index fell 30% for the year. Some growth stocks fell much more, with stock prices cut by half or two-thirds.

Which stocks are expected to rise the most in 2024?
