The backup battery in a UPS allows you to save/back up your data and shut down your sensitive electronic devices safely and/or avoid downtime altogether. For instance, the power capacity of the backup battery can buy you enough time to spin up power generators or supply power long enough until AC power is restored.

If you have an external USB hard drive, you can just back up to that drive using your computer's built-in backup features. On Windows 10 and Windows 11, use File History. On Macs, use Time Machine. Occasionally connect the drive to the computer and use the backup tool, or leave it plugged in whenever you're home, and it'll back up automatically.

While it's enough to power many pieces of equipment during a blackout, you can hook it up to an external battery backup to double the power. An inexpensive UPS with a small footprint. It provides enough power to keep small devices running for more than an hour (at 100 watts) after a power failure.
