What is a backup battery power supply?

Backup battery power supply is designed for use during outages and unsafe voltage fluctuations, and provides surge protector with battery backup in the event of damaging power surges and spikes.

Why should you use an ups power supply?

While UPS power is great for avoiding a sudden shutdown, you should not expect it to power your equipment for long hours without additional electrical backup, such as a generator. The main purpose of a UPS is to give you time to switch to alternative power or properly shut down your machine. Benefits of an uninterruptible power supply.

What is an APC battery back up power supply?

This APC battery back up power supply offers guaranteed power and surge protection for wireless networks, computers, and other electronics in your home or business.

How much power does an ups have?

It offers 300 watts of output power--perfectly suitable for a more modest setup. The UPS automatically switches off from the battery backup when your power comes back on. And when the time comes, you can replace its battery instead of replacing the entire unit. There are some tradeoffs to the more compact design.

The Eaton 5SC1500 is one of the high-rated units that use pure Sinewave output to protect your personal computer from power surges.
