

What is a solar buyback rate?

Here are some key aspects to keep in mind: The buyback rate is when the electricity company credits you for the excess energy your solar panels generate. Compare different plans to find the one that offers the most competitive buyback rate. You'll want to know the rate the energy company charges you for the electricity you consume from the grid.

What is a solar buyback plan?

Sometimes your panels may produce more energy than you need. With a solar buyback plan, you can sell that surplus energy back to the electricity company. There are many benefits to solar buyback plans. First, they provide an extra source of income, as you earn money from the excess energy produced. Second, they promote the use of renewable energy.

Can a net exporter buy back solar power?

You cannot be a net exporter, meaning they will not buy more power than the amount you use. If you want to sell excess power back to the grid at the market price (wholesale price), then Champion Energy is our top recommendation for solar buyback. All of their electricity plans are eligible for solar buyback.

Does pulse power offer a solar buyback plan?

Pulse Power used to offer the most popular solar buyback plan around. They had a "bundled" energy rate of power and delivery. And they purchased solar power back at the same rate, including delivery. While that was great for consumers, it was a big money loser for Pulse Power.

What is solar buyback Saver?

Solar Buyback Saver has a lower energy rate and is designed for homes that use more energy from the grid, or "net consumers." Here's a quick comparison to help you find the right fit for your system. Get paid for your excess energy at the same rate you pay us. Lock in a lower rate and get paid for your excess energy.
