systems operating through 34.5 kV (see Ratings and Specifications section of this catalog). These ratings and the wide range of programmable settings provided by Eaton's Cooper Power series electronic controls permit meeting a variety of application requirements. Recloser operation Fault currents are sensed by three 1000:1 ratio sensing current

edgeable Cooper Power Systems representative nearby. Cooper Power Systems" Kyle(R) Distribution Switchgear has long been recognized as the industry leader in the manufacture of distribution switchgear products, protecting electric power distribution systems and improving service reliability.

Cooper Power Systems Connecting Plug Item #: 0122101 Cat #: BLRTP635 UPC: \$ 911.26 EA. Company wide: Eaton designs its Cooper Power series 600/900 A deadbreak connector systems to fill the demand for a deadfront underground installation in 600/900 A main and lateral feeders. They provide a completely shielded, deadfront, fully submersible

Eaton's Cooper Power series BT-TAP deadbreak connector system includes a 200 A loadbreak tap instead of the standard insulated plug. The other components of BT-TAP are the same as BOL-T, making it an ideal option to retrofit existing BOL-T (or other bolted systems that use unthreaded compression connectors) systems with a 200 A loadbreak tap

Eaton's Cooper Power series VFI substation transformer combines a conventional distribution transformer with a vacuum fault interrupter (VFI) ??? delivering both voltage transformation and transformer overcurrent protection in a single space- and money- saving package. Transformers intended for indoor use are filled with safe, efficient FR3 dielectric fluid, offering enhanced fire ???

COOPER POWER SYSTEMS

, Cooper Power Systems has provided the tri-state area with 24/7 emergency back-up and temporary electrical power to millions of customers. Read More. Is Cooper Power Systems a public company? Cooper Power Systems is private company therefore does not currently have an official ticker symbol.

Eaton provides a range of power delivery, automation and control, metering and demand response solutions with its Cooper Power series products to increase efficiency and support smart operations. Eaton serves customers in the commercial, utility, mining, industrial, manufacturing, renewable energy and other markets.

Eaton leads the industry in the application of single-phase voltage regulators into substations regulating loads up to 60 MVA. With features such as fan cooling and insulating fluid filtration, substation voltage regulators provide a viable option superior to the use of On-Load Tap-Changers (OLTC) with the added flexibility of regulation separate from the power transformer.

COOPER POWER SYSTEMS

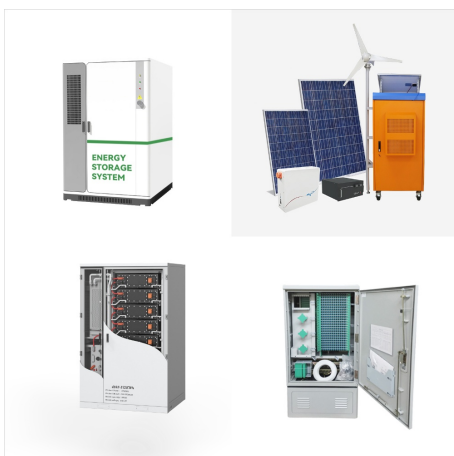

BLRTP615

Cooper Power Systems, a division of Eaton Corporation, is a renowned global provider of electric transformers and comprehensive solutions for electrical power management. With a legacy spanning over a century, the company has built a solid reputation for delivering innovative and reliable products that meet the evolving needs of the power industry.

Cooper Power Systems is a distributor of electrical equipment. It offers diesel and gaseous generators, automatic transfer switches, accessories, and other products for residential, commercial, and industrial sectors. The company also provides rentals, parts, fluid testing, maintenance agreement services, and more.
