Eaton leads the industry in the application of single-phase voltage regulators into substations regulating loads up to 60 MVA. With features such as fan cooling and insulating fluid filtration, substation voltage regulators provide a viable option superior to the use of On-Load Tap-Changers (OLTC) with the added flexibility of regulation separate from the power transformer.

Eaton provides a range of power delivery, automation and control, metering and demand response solutions with its Cooper Power series products to increase efficiency and support smart operations. Eaton serves customers in the commercial, utility, mining, industrial, manufacturing, renewable energy and other markets.

Three-phase switching on systems rated up to 15.5 kV is provided by DAS15 switches. DAS27 switches can be applied on systems rated through 27.0 kV. Higher-voltage system switching at 38.0 kV is provided by DAS38 switches. Compact and lightweight, DAS switches are easily installed on poles or in substations.
