

How much do solar panels cost in Georgia?

Most Georgian households, given the state's warmer climate and consequently higher energy consumption, lean towards a 10-kW system to meet their energy needs. And the average price tag for solar panels in Georgia? About \$3.74 per watt.

How much does a 5 kW solar system cost in Georgia?

While a 5 kW system will only cost you \$13,173 in Georgia, doubling the system size effectively doubles the price, so you'll pay about twice that for a 10 kW system. The higher the price tag, though, the more you'll get back as a credit towards your federal tax bill. Are solar panels worth it in Georgia?

Are solar panels a good investment in Georgia?

Solar panel costs in Georgia have dropped by 54% over the past decade. The state offers unique solar incentives, targeting large-scale solar farms. Initial solar investment is substantial, but long-term savings and energy independence are significant benefits.

How much does solar cost in the Peach State?

Going solar in the Peach State is about 17% more expensive than the national average. The out-of-pocket investment might be higher compared with other states, but net metering and other factors can make the cost substantially lower. The average cost per watt is \$2.95 in Georgia.

What tax credits do solar panels get in Georgia?

The federal solar investment tax credit (ITC) is the biggest factor reducing the cost of going solar in Georgia. If you install a residential solar panel system by the end of 2032, you receive a federal income tax credit equal to 30% of the system's total cost. That includes equipment, labor and permits.

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of
