

What are 2CR5 photo lithium batteries?

An online purveyor of all types of batteries, ONLYBatteries.com, states on its website: "2CR5 Photo Lithium Batteries are 6 Volt batteries, commonly used in today's digital cameras and flashes. They are heavily manufactured by leaders in battery production such as: Duracell, Panasonic, Sanyo and Energizer.

What is the Energizer lithium 2CR5 battery?

Never miss capturing a moment with the Energizer Lithium 2CR5 Battery. It's designed to deliver precise, long-lasting performance for today's high-tech, power-hungry cameras and flash units. The Energizer lithium photo battery, 2CR5 will leave a lasting impression. No other battery takes more pictures, based on industry-standard testing.

Who makes 2CR5 batteries?

They are heavily manufactured by leaders in battery production such as: Duracell, Panasonic, Sanyo and Energizer. The 2CR5 is a disposable (single-use, non rechargeable) lithium camera battery."

What is the difference between 2CR5 and CR123A batteries?

The 2CR5 battery is suitable for devices that require higher voltage and capacity, while the CR123A battery is more affordable and widely available. When deciding between these two batteries, take into account your particular needs as well as the specifications of your gadget.

Are Energizer 2CR5 photo batteries good?

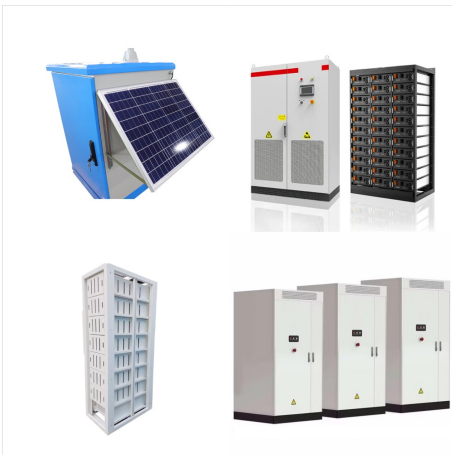

Never miss capturing a moment: Energizer 2CR5 Lithium 6-Volt Photo Batteries are designed to deliver precise, long-lasting performance to today's high-tech, power-hungry cameras and flash units. Our 6V Photo Batteries will leave a lasting impression: No other battery takes more pictures, based on industry-standard testing.

Why should you buy a 2CR5 battery?

The 2CR5 battery excels at storing a significant quantity of energy in a small package thanks to its high energy density. This is especially useful for high-end digital cameras and electronic flash units, and other devices that draw a lot of power.

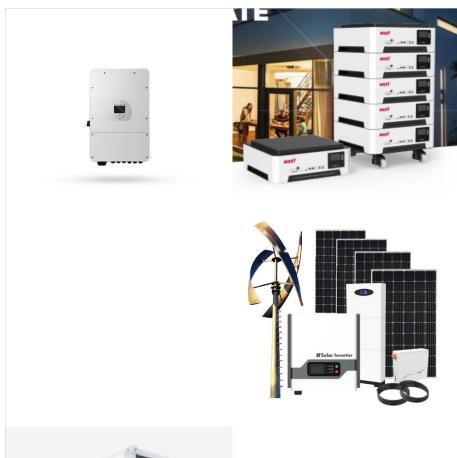

The Panasonic 2CR5M (245, 2CR5) is a quintessential choice for both photography enthusiasts and professionals as it offers versatile compatibility for a variety of devices, including SLR cameras, flash units, and other photographic tools, ensuring seamless integration and functionality.

The 2CR5 battery is a lithium battery made of two
 smaller, 3 volt batteries (123 cells, popular with the
 high intensity flashlight crowd) attached in series to
 make 6 volts. In the specimen seen above, these
 batteries are clearly seen. Duracell and other
 battery manufacturers place a sticker label around
 the battery so the two cells are not
